Rumors of War.

The Dominion Government Ha Another Red River Rebellion on Hand--Causes Which Have Led to the Trouble.

OTTAWA, ONT., July 23 .- A sensational dispatch from Winnepeg, stating that the Crees and half-breeds had made an uprising near Fort Carleton, and in an engagement with the mounted police killed several of the latter, was received here last night. The story is received with a certain amount of suspicion, as the Dominion Government received a couple of dispatches from Gov. Norris yesierday, in which no mention was made of the occurrence.

orrawa, Ont., July 23.—Although rumore were in circulation here to-day
with regard to the uprising of Oree Indians, assisted by some half-breeds and
malcontents in the Northwest, they
were here generally discredited, but dispatches have since been received by the
Secretary confirming to a great extent
the reports in circulation prior to that
time, and it is feared that human life has
been sacrificed in a daring attempt on
the part of rebels to capture and hold
Fort Carleton. Goy. Morris has infan-OTTAWA, ONT., July 28 .- Although ru-

mation of a very alarming character, and has partially put the Dominion Government in possession of the leading features. It appears that the Cree Indians have been worked upon by outside influence, and that the half-breeds, being dissati-fied with the commissioners sent by the Dominion Government, and fearing that they were not going to receive fair play, at once threw their influence in with other maleontents.

They say that half the arable lands in the province are being sorted by railway speculators and the Hudson Bay Company. That whereas, the Cree Indians and half-breed families were to receive certain tracts of land, still no equitable division has been made, and the two Commissioners sent up to the Northwest know nothing about their business, and are only intent on deceiving the people by a policy of delay. Of course the fears of those who have taken the law in their own hands are greatly exaggerated, and have led them to gravely intringe on the laws of the country. No really definite intelligence can be furnished as yet, still enough is known to warrant the gravest apprehension.

The Breadstuff Market-Threatened Strike-Brooklyn Chief of Police on Trial-Suicide to Please a Brother, etc., etc.

NEW YORK, July 23 .- The excitement in the breadstoff market for the past few days has no precedent in the history of the trade. The agitation is not only local but general. At Chicago the advance has been so rapid and violent that seri-ons results are apprehended, and rumors have already become current of embar-rasement of promitent firms; and fall-ures for large amounts would not be sur-neising.

prising.

The local market has been fearfully agitated, and under the excitement prices have advanced as much as six prices have advanced as much as six cents per bushel in one day. This however was the extreme hight. With an improvement of 2 and 3 cents daily, a very larges business has been consummated. The general advance seems to be well founded, and from indications it will be very difficult to break the market down to anything like the figures of a few weeks since.

down to anything like the figures of a few weeks since.

Continental buyers have purchased all the wheat in this market, including the supply in canal, and, in hact, have extended their operations in grain till they have reached that which is still to be shipped from the West. The feeling here is rather Bearish in character, but the general situation of the entire market, both here and abroad, seems to warrant current high prices:

> Upon the coast of Nova Scotia, within Upon the coast of Nova Stotia, within a short distance of the United States, there are coal-nines of great value, which, unlike any others in the whole world, are located so advantageously in respect to ocean navigation that almost by the action of gravity alone the coal may be delivered from the mouth of the pit upon the deck of the vessel. Now, for years the government of the United States imposed a tax on the landing of this coal within its territory, of one dollar and twenty-five cents per ton. Bert if we assume that coal upon a well-managed railroad can be transported for one cent per ton per mile, the effect of this tax upon the people of New York and New England is precisely equivalent to a removal of these coal-mines of Nova Scotia from a point on the seaboard to a location one hundred and twenty-five miles into the interior was a beanthese mines one hundred and twenty-five miles into the interior was a bene-fit to the people of the United States, s

blessing, and that their utter annihila-tion would be the superlative good of Again, some years since an English engineer, Mr. Bessemer, devised a new process for the manufacture of steel. He did not claim to make anything new; he did not claim to make steel, of a quality superior to what was made before he did succeed in showing mankind how to make an article indispensable in the work of production cheap, which was be-lore dear. Immediately upon the as-sured success of the lavention, the ad-vocates of protection in the United States asked Congress to impose such a duty on the largest of this Steel as would, duty on the import of this steel as would, through a consequent increase of its price to American consumers, almost neutralize the only benefit accraing from the knowledge and use of the new process, namely, its cheapness, and they succeeded in obtaining, and stil (1875) retain, a duty that in a great degree accomplishes such a result.

What this result practically has been may be illustrated by status; that in 1872 the Michigan Central Reproad re-land its track at Detroit with sicel rails into its track at Detroit with a cell rails costing ninety-seven dollars (gold) per ton, while at a distance of hair a mile (across the Detroit River) the Canada Southern Bailfoad was laying down the same kind of rails at a cost of soventy dollars (gold) per ton. Will the reader here ask himself, who pays the tax thus levied in perpetulay on this road, or, what is the same things on the privilegy of using it; and whether any corresponding benefit in prope tity accrues from the tax?—David A.
